

IAITAM ACE

May 7-9, 2024 The M Resort 🌴 Las Vegas, NV

Visualized Cost Analysis: A Game-Changer in Software Licensing Strategies

Linda Cole, Sr. Solution Architect
Open iT, Inc.

Finding your IAITAM Oasis

Open*iT*®

Agenda

Why cost analysis?

What are the challenges?

Where to start?

Examples

May 7-9, 2024 The M Resort  Las Vegas, NV

Open)IT[®]

Why Cost Analysis?

- Prepare for Vendor Negotiations
- Streamline analysis
- Reduce preparation time
- Identify cost associated with optimization

May 7-9, 2024 The M Resort 🌴 Las Vegas, NV

Open)IT®

Challenges

Time

- Not enough resources to prepare 6-12 months in advance for all contracts
- Turnover

Visibility

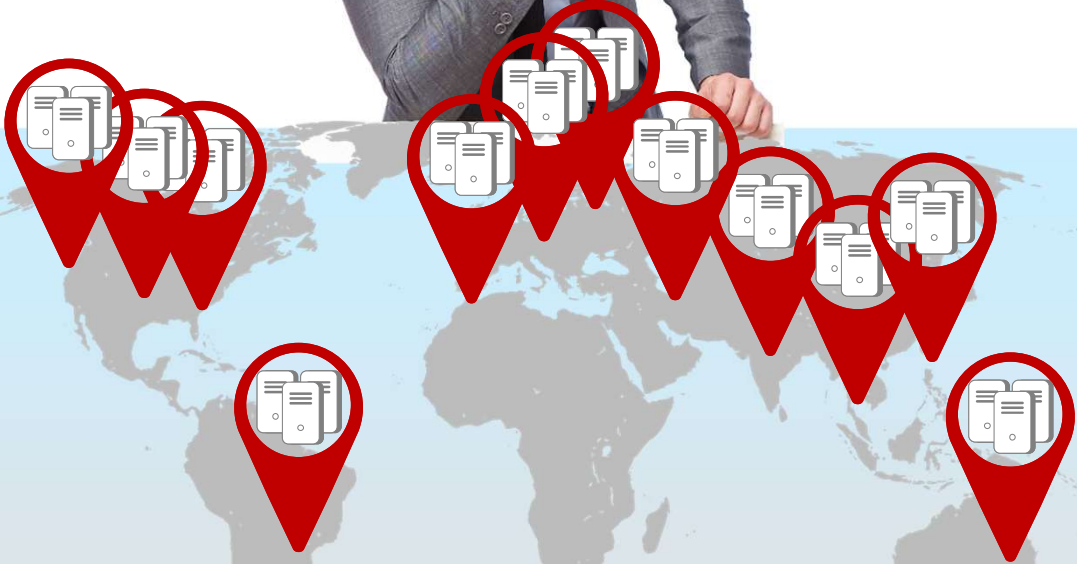

- Limited to no visibility into what you own vs what is installed or being used
- Limited visibility into who is using what

May 7-9, 2024 The M Resort  Las Vegas, NV

Open)IT[®]

Where to start?

Optimize first

Review overall portfolio

- Identify license shortages that may be affecting efficiency
- Identify over licensing

Competitive alternatives

- Are you using competitive products that may be consolidated
- Inquire with users
- Preferences, ease of use
- Is it a training gap for preference?

Inquire with business units

Why did they request licenses but do not appear to be using?

LICENSE TYPES

May 7-9, 2024 The M Resort 🌴 Las Vegas, NV

Open)IT®

Approach by License Type

Concurrent

- View overall usage trends and patterns
- License Efficiency
- Zero Usage

Named User

- Days Since Last Used
- Reallocate licenses
- Frequency of reassignment

Consumption

- PPU/Tokens/CostperDay

- Review spend down rate
- Monthly trend
- Options to optimize
- Camping

FORECAST TO ACTUAL

May 7-9, 2024 The M Resort  Las Vegas, NV

Open)IT[®]

Forecast to Actual

- If you have forecast by department/cost center/group
 - Review forecast to actual
 - Follow up with groups to determine why forecast off
 - Will it continue
 - Modify future forecast
- Determine needs for renewals

May 7-9, 2024 The M Resort  Las Vegas, NV

Open)IT[®]

License Efficiency – with Potential Savings

www.openit.com

License Cost Savings based on Efficiency

Calculates the potential savings for 365 days based on 100, 99, or 95 Percentile of License Efficiency.

Report Period: from 2023-01-01 to 2023-12-31

Type	Product	Application Name	Max Available	99% ¹ Max in Use	99% Delta ²	Unit Cost ³	Savings ⁴
Feature	Catia	AB3	389	268	121	\$2,870	\$347,270
	Actify	Spinfire11	500	170	330	\$1,750	\$577,500
Grand Total							\$924,770

- 1) Max In Use - minimum of percent (95, 99 or 100%) of the time, the license usage is at or below the reported value.
- 2) Delta - Difference between the Max Available license and License within Usage Percentile.
- 3) Unit Cost - Price per license per day based on configured in the License Cost Catalog.
- 4) Savings - Calculated Total Cost based on the Delta and Unit Cost.

OPTIMIZATION

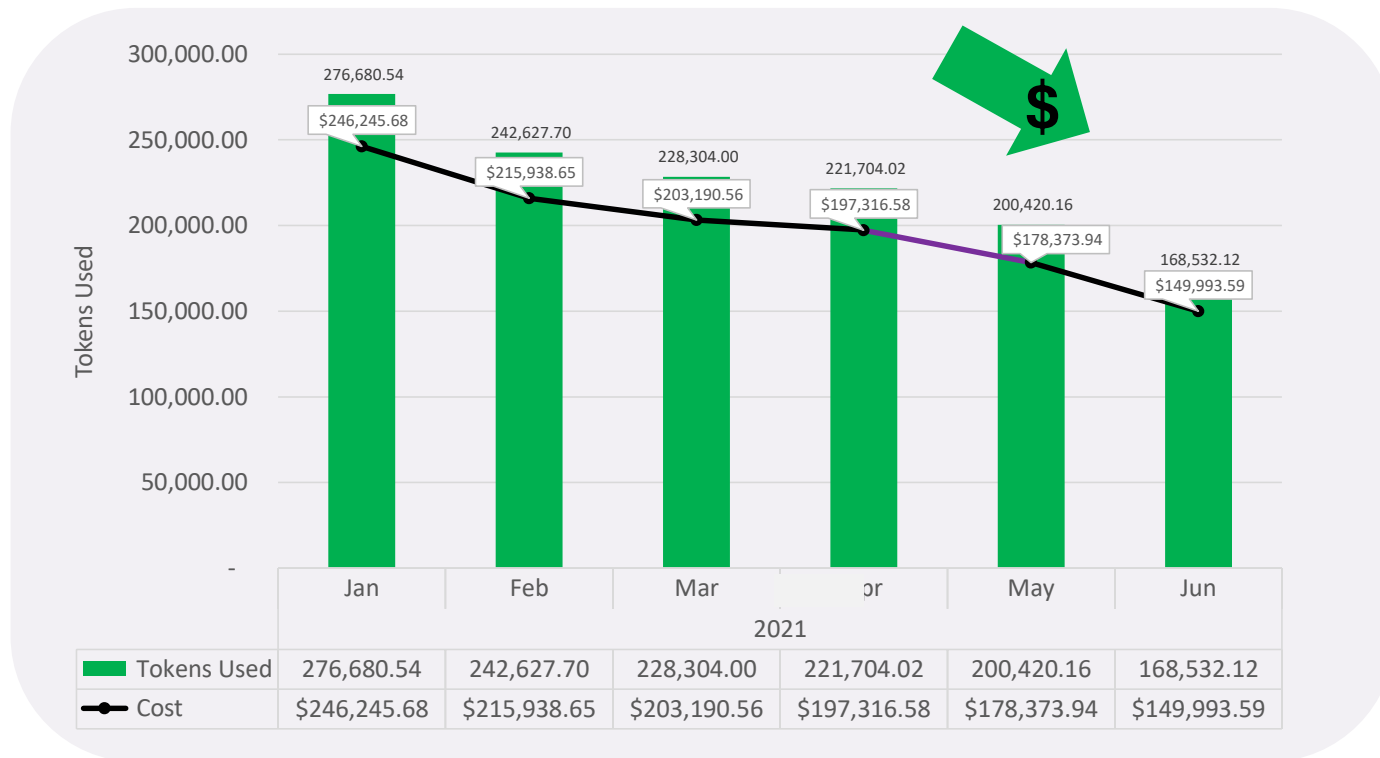

May 7-9, 2024 The M Resort  Las Vegas, NV

Open)IT[®]

Results of Harvesting

Savings \$ 147,059 in 6 months

May 7-9, 2024 The M Resort 🌴 Las Vegas, NV

Usage Data is Not Enough

Provides comprehensive understanding of overall expenditure

Helps make informed decisions on budget allocation and resource management

Allow more accurate assessment of ROI, optimization strategies and identifying potential savings

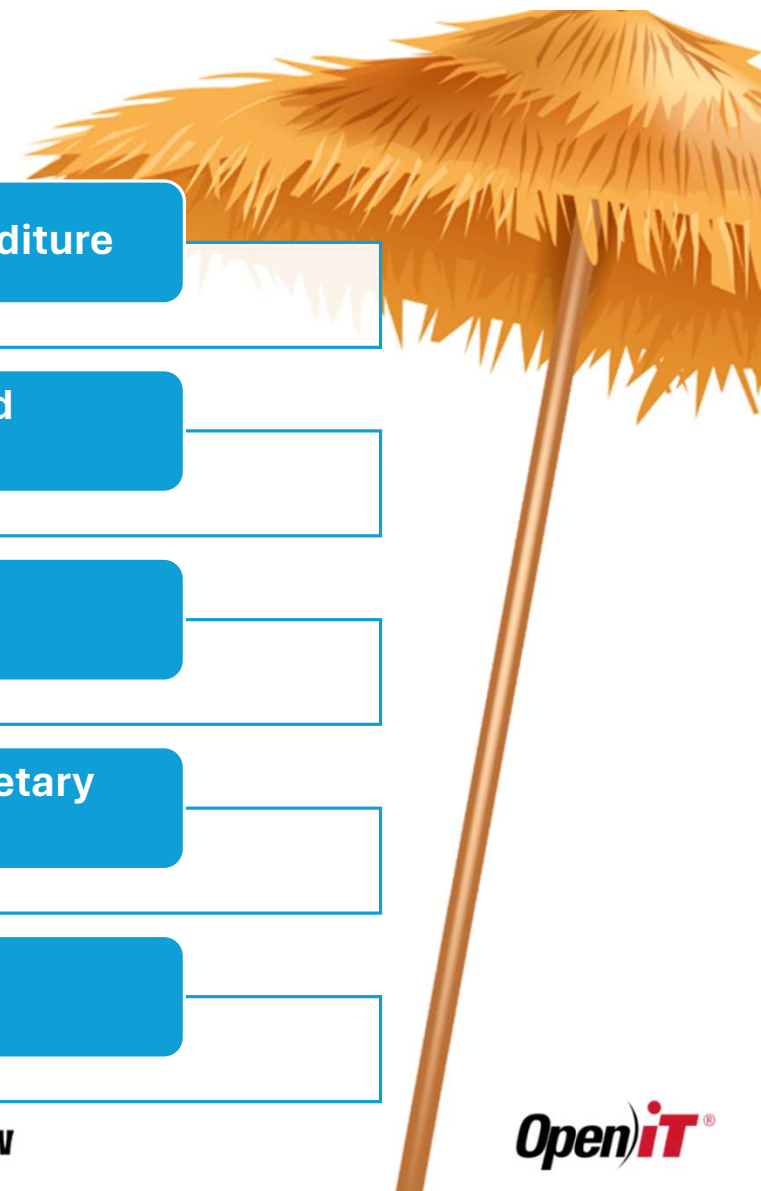

Enables organizations to align software usage with budgetary constraints for efficient allocation of resources

Facilitates overall cost-effective software investments
