What do "we" want to talk about?

1. Will Artificial Intelligence replace me?
2. Does ITAM require a rebranding effort?
3. Data, Data and more Data.....Why it's important to collect and own it!
4. Do we want to own anything? "Everything" as-a-service?
5. ESG relevance?
6. Suppliers and their role in IT Asset Management
7. Roller Coaster complex of the ITAM practitioners
8. Any topic I missed and is important to "you!"
